

Enabling health and care systems transformation through research and innovation

NEODIPPE

New Evidences on Diabetes Prevention and Patient Empowerment

Total Investment

127 500,00 €

Maximum Total Funding

127 500,00 €

Portuguese State Budget

100%

Start Date

03 / 11 / 2025

End Date

02 / 05 / 2028

Project Reference

THCS/0008/2024

Beneficiary Entity

**Fundação Minerva – Cultura – Ensino e
Investigação Científica**

Principal Investigator

Luís Valadares Tavares

NEODIPPE aims:

- A. Understanding the relationship between the features of the patients and their behaviour concerning the risk perception of diabetes (either type 1 or type 2) and the use of technological devices
- B. Independent assessment of the technological devices considering a cost-benefit balance and their adoption for different types of patients
- C. Modelling the decision process of the patient to contribute to his empowerment to prevent diabetes, making the most appropriate use of information signals, and monitoring
- D. Proposing recommendations for clinical practice to cope with technologies and new organizational models to provide better health services for diabetes and more rational policies for public support, funding, and technological procurement
